

Implementation Services

OFFERING SUMMARY

Busy IT departments find it more challenging than ever to operate and maintain traditional backup environments, much less plan, install, and configure a modern data services solution. Trust Commvault Professional Services to consistently deliver a smooth transition from legacy backup and archive solutions to a modern approach based on Commvault® Cloud. Commvault's proven methodologies and global team of seasoned technologists can help reduce any implementation's time, effort, and risk.

HIGHLIGHTS

- 1 Commvault Professional Services provide Implementation Services to deploy the Commvault® Cloud and data protection agents quickly and efficiently, allowing our customers to focus on their priorities.
- 2 Customers reduce the time to value of their data protection management platform and reduce implementation risks by using experts from the vendor.

KEY SERVICE COMPONENTS AND BENEFITS

Component	Description	Benefits
Project kick off	The Commvault Project Manager introduces the delivery team, project timelines are established, and the Commvault design documentation is reviewed before deployment.	Minimize your time and effort to develop a robust implementation plan for deploying Commvault® Cloud.
Data management optimization	Seasoned Commvault consultants provide continuity with the installation and configuration of your Commvault® Cloud environment.	Accelerate the time to value of your data management solution.
Prioritized planning	Testing is performed on the environment, including core functionality and backups and restores of the agent type(s) in scope.	Testing provides peace of mind of a stable data protection platform prior to customer handover.
Business-aligned remediation	Commvault Engineers cover basic setup, feature configuration, and other topics specific to your environment as requested by your staff within the project scope.	Improve the overall availability of your Commvault® Cloud solution and develop IT staff that will have the capability to maintain operational efficiencies.

Our experts help you get the most from your Commvault® Cloud deployment. To learn more about optimizing your data management environment, training your team, and obtaining the specific services you require. Visit commvault.com/services
