

Secure Your SaaS Applications with a Trusted SaaS Solution

Award-winning SaaS data protection from the minds of Commvault

Use a SaaS solution to manage and protect your SaaS applications.

SaaS apps are now the norm in most organizations—apps like Office 365, Dynamics 365, Active Directory, Salesforce, and more. They’re proven to increase user performance, lower expenditures, and simplify how companies deploy and manage solutions. With more remote workers, businesses of every size depend on SaaS solutions to maximize productivity.

Metallic delivers industry-proven protection for SaaS in any environment.

Metallic, built on industry-leading Commvault technologies and powered by Microsoft Azure, delivers trusted backup and recovery with the simplicity of SaaS. With Metallic, you get cost-effective and industry-trusted data protection without the complexity – so you only pay for what you need. And, with [Metallic SaaS Plus](#), you gain options of both on-prem and in cloud storage to match your hybrid cloud strategy and recovery requirements.

Commvault and Azure together

Commvault is the recognized leader in data management. Microsoft leverages Commvault to manage and protect some of its most important data including data in Azure, Office 365, Xbox, and other technologies. The Microsoft + Commvault alliance spans 20+ years of co-designing, co-engineering, and delivering industry-leading data solutions.

World-class data protection with the simplicity of SaaS:

-  Protect Microsoft 365, Dynamics 365, and other apps from a single view
-  Meet SLA compliance with extended data retention
-  Isolate data backups outside source environments
-  Recover data fast with flexible search and restore options
-  Deploy in minutes and manage remotely

Customer success story

“We reviewed the other offerings and they required us to have an existing Infrastructure as a Service. But with Metallic Office 365 Backup, there was no infrastructure or hardware expenses and that saved us an initial investment of \$50,000 and had the first backup running within hours of signing up.”

Robert Passlow

Infrastructure Team Lead | Dialog Information Technology
